Civil Liability Under Exchange Act Rule 10b-5 for Misappropriators of Nonpublic Information: An Argument for Consistency

Matthew A. Aufman
CIVIL LIABILITY UNDER EXCHANGE ACT RULE 10B-5 FOR MISAPPROPRIATORS OF NONPUBLIC INFORMATION: AN ARGUMENT FOR CONSISTENCY

The Securities Exchange Act of 1934 is the cornerstone of the federal government's efforts to regulate the securities markets; Rule 10b-5 lies at the heart of the federal regulatory framework. The broad language of Rule 10b-5 and the underlying statute are designed to catch a wide variety of fraudulent schemes that wreak havoc on securities markets. The Securities and Exchange Commission ("SEC") enforces these provisions.

Traditionally, the SEC has used Rule 10b-5 to combat insider trading. Typically, an insider is a corporate official who obtains material, nonpublic information about the corporation in the course of employment. An insider obtains confidential information about the corporation as a result of the insider's position of trust within the corporation. This gives rise to a fiduciary duty to the corporation's shareholders under state law, apart from the duties imposed by federal securities law. Rule 10b-5 prohibits an insider from trading in the corporation's securities based on material, nonpublic information because such trading is a fraudulent breach of the insider's duty to the corporation's shareholders.

The misappropriation theory expands Rule 10b-5 to prohibit conduct that does not fall within the traditional conception of insider trading. The misappropriation theory applies when a person other

7 See id.
8 See id.
9 See id. at 652-53.
than a corporate insider obtains material, nonpublic information about a corporation from a source to which that person owes a fiduciary duty.\textsuperscript{10} Under the theory, that person takes the nonpublic information and "misappropriates" it for his or her own use by engaging in a securities transaction.\textsuperscript{11} Thus, like a traditional insider, the misappropriator's actions produce unfair, risk-free profits and thereby cause the harms that securities laws aim to prevent.\textsuperscript{12}

Since its inception, the misappropriation theory has aroused considerable controversy.\textsuperscript{13} In 1997, the United States Supreme Court upheld the validity of the misappropriation theory in the criminal context.\textsuperscript{14} The policies driving securities regulation in general, and Rule 10b-5 in particular, militate in favor of the misappropriation theory's adoption in civil cases as well.\textsuperscript{15}

This Note will first survey the origin and development of the misappropriation theory in the criminal context.\textsuperscript{16} Second, this Note will provide a detailed analysis of \textit{United States v. O'Hagan}, the case that settled the controversy surrounding the misappropriation theory.\textsuperscript{17} Third, this Note will explore the policy underpinnings of civil suits under Rule 10b-5.\textsuperscript{18} Lastly, it will argue that application of the misappropriation theory in civil actions would further these policy goals.\textsuperscript{19}

\section{The Road to \textit{O'Hagan}: Development of the Misappropriation Theory in the Criminal Context}

Section 10(b) of the Securities Exchange Act of 1934 provides, in relevant part: "It shall be unlawful for any person, directly or indirectly, . . . to use or employ, in connection with the purchase or sale of any security . . . any manipulative or deceptive device or contrivance in contravention of such rules and regulations [that the SEC may provide]."\textsuperscript{20} Acting pursuant to this grant of rulemaking authority, the SEC promulgated Rule 10b-5.\textsuperscript{21} The Rule provides, in relevant part: "It shall

\textsuperscript{10} See O'Hagan, 521 U.S. at 652.
\textsuperscript{11} See id.
\textsuperscript{12} See id. at 659.
\textsuperscript{14} See O'Hagan, 521 U.S. at 650.
\textsuperscript{16} See infra notes 20-111 and accompanying text.
\textsuperscript{17} See infra notes 112-51 and accompanying text.
\textsuperscript{18} See infra notes 152-88 and accompanying text.
\textsuperscript{19} See infra notes 189-231 and accompanying text.
\textsuperscript{21} See 17 C.F.R. § 240.10b-5.
be unlawful for any person, directly or indirectly, . . . to employ any
device, scheme, or artifice to defraud . . . [or] . . . to engage in any
act, practice, or course of business which operates or would operate as
a fraud or deceit upon any person, in connection with the purchase
or sale of any security.” \(^{22}\) Section 10(b) speaks of “deception,” whereas
Rule 10b-5 speaks of “fraud.” \(^{23}\) The distinction may seem meaningless,
because deception is a necessary element of a fraudulent act. \(^{24}\)
Nevertheless, many courts focus on the language of section 10(b), rather
than the language of Rule 10b-5. \(^{25}\)

In 1980, the United States Supreme Court decided Chiarella v.
United States, a landmark case construing Rule 10b-5 in the criminal
context. \(^{26}\) The Court held that Rule 10b-5 does not create a general
duty requiring investors to disclose material, nonpublic information
before trading. \(^{27}\) Such a duty, the Court reasoned, arises only where
the party in possession of the information has a duty to disclose. \(^{28}\)
Because the Court determined that the misappropriation theory was
not presented to the jury, it declined to rule on the theory’s validity. \(^{29}\)

The defendant, Vincent Chiarella, worked for Pandick Press, a
financial printer. \(^{30}\) Among other things, Pandick Press printed corpo-
rate takeover bids. \(^{31}\) The names of the acquiring company and target
company were omitted from the documents supplied to the printer. \(^{32}\)
The companies’ names were supplied at the last minute. \(^{33}\) In five
instances, however, Mr. Chiarella used the other information in the
documents to deduce which companies were involved. \(^{34}\) Armed with
this information, he purchased stock in the target corporations. \(^{35}\) Mr.
Chiarella later was indicted for violations of Rule 10b-5. 36 At trial, the
judge instructed the jury to convict Mr. Chiarella if it determined that
he traded on material information when "he knew other people trad-
ing in the securities market did not have access to the same informa-
tion." 37 The jury returned convictions on all counts, which the Second
Circuit ultimately affirmed. 38

The Supreme Court overturned Mr. Chiarella's convictions. 39 The
Court asserted that a person has no duty to refrain from trading in
securities solely because that person possesses material, nonpublic
information relating to those securities. 40 The Court noted that there is
no legislative history suggesting that Congress intended such a sweep-
ing effect when it enacted section 10(b). 41 The Court also stated that
some of the SEC's own regulations recognized that investors had no
general duty to disclose material, nonpublic information before trad-
ing. 42

Having concluded that Rule 10b-5 does not create a general duty
to disclose nonpublic information, the Court reasoned that Mr. Chia-
rella did not violate Rule 10b-5 unless he violated a duty existing apart
from federal securities law that made his failure to disclose fraudu-
 lent. 43 Ostensibly, there were two parties to whom Mr. Chiarella could
have owed such a duty: (1) the sellers of the stock; and (2) the acquir-
ing company, from which Mr. Chiarella had converted the nonpublic
information. 44

The Court rejected the notion that Mr. Chiarella owed a duty to
the sellers of the stock. 45 The Court distinguished Mr. Chiarella from
a traditional "insider," who obtains material, nonpublic information
about a corporation through the insider's position of trust within that
corporation. 46 In such cases, the insider owes a fiduciary duty to the
corporation's shareholders. 47 Therefore, the insider's failure to disclose

36 See Chiarella, 445 U.S. at 224. The case provides no information about the circumstances
that led to the discovery of Mr. Chiarella's alleged fraud. See id.

46 See Chiarella, 445 U.S. at 232 ("[Mr. Chiarella] was not a fiduciary . . . in whom the sellers
had placed their trust and confidence.").
47 See id. at 230 ("Application of a duty to disclose prior to trading guarantees that corporate
material, nonpublic information when trading in the corporation's stock is fraudulent and falls within the ambit of Rule 10b-5. Mr. Chiarella, however, had no relationship with the target corporation. Therefore, the Court concluded that he had no fiduciary duty to the corporation's shareholders.

The Court declined to decide whether Mr. Chiarella could be culpable under Rule 10b-5 for breaching his duty to the acquiring corporation by "misappropriating" its nonpublic information for his own use. There was no question that Mr. Chiarella breached a duty to his employer when he used information obtained in the course of his employment for his own personal trading purposes. Nevertheless, the Court determined that the jury instructions did not require Mr. Chiarella to have violated any duty for him to have been guilty of violating Rule 10b-5. Thus, the Court ruled that the misappropriation theory was not at issue. By so deciding, the Court missed an early opportunity to settle the ambiguity surrounding the misappropriation theory.

In his influential dissenting opinion in *Chiarella*, Chief Justice Burger argued that the misappropriation theory was properly charged in the case and that it was an acceptable basis for criminal liability under Rule 10b-5. The Chief Justice agreed with the majority's assertion that there is no general duty to disclose material, nonpublic information before trading. He explained that this lack of duty re-
fects a policy in favor of encouraging investors to gather and analyze as much relevant information as possible. By allowing investors that do not act deviously to use informational advantages to reap profits, the law rewards those who are skilled in the art of gathering and analyzing market information.

Having defined his view of the policy underlying the lack of a general "disclose or abstain" rule, the Chief Justice argued that courts should use the Rule's policy underpinnings to define the Rule's limits. The law encourages non-fraudulent gathering and analysis of information; thus, the Chief Justice argued, courts should not invoke the same policy concerns to protect those who obtain material, non-public information through fraudulent means. Mr. Chiarella's actions were fraudulent because he misappropriated the acquiring company's confidential information, without the acquiring company's permission and in violation of his fiduciary duty to his employer, the printer. By using the misappropriated information to reap profits in the securities markets, the Chief Justice argued, Mr. Chiarella violated Rule 10b-5.

Three years later, in 1983, the United States Supreme Court revisited the parameters of liability under Rule 10b-5 in Dirks v. SEC. In Dirks, the Court overturned a conviction in an SEC proceeding against a broker who obtained information about fraud at a corporation and subsequently shared that information with investors, who traded in reliance on that information before it became public. The Court reaffirmed its holding in Chiarella that there is no general duty for a person in possession of material, nonpublic information about a corporation to disclose the information before trading in the corporation's securities. Citing Chiarella, the Court in Dirks ruled that a duty to disclose material, nonpublic information arises only where failure to do so would breach a duty that exists apart from the securities laws.

The defendant, Raymond Dirks, was an officer in a brokerage firm. Mr. Dirks received information about alleged fraud at Equity Funding of America ("Equity") from an Equity employee. Mr. Dirks

investigated and verified the validity of the allegations. Mr. Dirks called a Wall Street Journal reporter and urged him to write a story about the allegations, but the reporter declined to pursue the story. During the course of his investigation, Mr. Dirks informed his firm's clients and other investors about the problems at Equity. As a result, many Equity stockholders sold their interests in the corporation, and the price of Equity stock fell precipitously. In response, the New York Stock Exchange halted trading. Federal and state investigations of Equity resulted in many criminal indictments.

In addition, the SEC investigated Mr. Dirks's role in bringing the fraud at Equity to light. In administrative proceedings, Mr. Dirks was found guilty of aiding and abetting violations of federal securities laws, including Rule 10b-5. The SEC reasoned that "tippees" incur an obligation to "disclose or abstain" when they knowingly receive material, nonpublic information from corporate insiders. The SEC censured Mr. Dirks but declined to impose more severe punishment, citing Mr. Dirks's role in exposing the fraud at Equity. Nevertheless, Mr. Dirks appealed the SEC's ruling to the United States Court of Appeals for the District of Columbia, a divided panel that affirmed the SEC's judgment.

The Supreme Court began its analysis in Dirks by reaffirming its holding in Chiarella that there is no general duty to "disclose or abstain." Therefore, unless Mr. Dirks had a specific duty to disclose the nonpublic information, he did not violate Rule 10b-5. The SEC argued that Mr. Dirks assumed such a duty when he knowingly received information from Equity insiders, who certainly could not have traded on the nonpublic information that they provided to Mr. Dirks.

Rejecting the SEC's argument, the Court asserted that Equity employees who provided Mr. Dirks with nonpublic information had

not violated their fiduciary duty to Equity.\textsuperscript{84} The Court reasoned that because the Equity employees violated no duty to their employer, Mr. Dirks had no duty to disclose that arose from those employees' duty to Equity.\textsuperscript{85} Furthermore, Mr. Dirks had no independent duty to Equity.\textsuperscript{86} Thus, the Court concluded that Mr. Dirks did not violate Rule 10b-5, and the Court overturned the lower court's judgment.

Despite the Supreme Court's ruling in \textit{Dirks}, the Second Circuit continued to apply the misappropriation theory.\textsuperscript{87} By so doing, the Second Circuit accepted the Supreme Court's determination that breach of a specific duty was a necessary element of liability under Rule 10b-5, but held that Rule 10b-5 did not require the party aggrieved by the breach of duty to be a party to the securities transaction that consummated the fraud.\textsuperscript{88} The Seventh and Ninth Circuits followed the Second Circuit in endorsing the misappropriation theory.\textsuperscript{89}

In 1995, in \textit{United States v. Bryan}, the Fourth Circuit became the first federal appellate court to reject the misappropriation theory.\textsuperscript{90} The court held that the misappropriation theory failed to satisfy the requirement that the actor's fraud occur "in connection with the purchase or sale" of securities.\textsuperscript{91} Unlike the courts that embraced the misappropriation theory, the Fourth Circuit rejected the notion that a violation of Rule 10b-5 could be established by proving fraud, a securities transaction and a necessary connection between the two.\textsuperscript{92} Instead, the court read Rule 10b-5 as imposing one "single indivisible requirement" for liability.\textsuperscript{93} The court held that misappropriation of material, nonpublic information, followed by the use of that information in a securities transaction, did not satisfy that unitary requirement.\textsuperscript{94}

In \textit{Bryan}, the government charged the defendant, Elton Bryan, with mail fraud, wire fraud and perjury, in addition to violation of Rule

10b-5. All the charges arose from Mr. Bryan's actions during his tenure as director of West Virginia's state lottery. A jury found him guilty of violating Rule 10b-5 because he profited from securities transactions that he made based on material, nonpublic information that was entrusted to him in the course of his employment.

Throughout its opinion, the Fourth Circuit emphasized the language of section 10(b), which requires "manipulation" or "deception." Acknowledging that "manipulation" is a "term of art" in the securities field and that the term had no bearing in the instant case, the court focused on the deception requirement. A deceptive act in this context, the court reasoned, could take two forms: (1) material misstatement of fact, or (2) breach of a duty to disclose.

The opinion presents no facts suggesting that a deceptive act of the first sort took place. Although the court acknowledged that Mr. Bryan's use of opportunities obtained in the course of his employment constituted a breach of his duty to his employer, it rejected the notion that such a breach falls within the purview of Rule 10b-5. Citing Supreme Court precedent, the Fourth Circuit concluded that "deception" within the meaning of section 10(b) applied only to deception of buyers, sellers, investors and other parties with a similar interest in a given securities transaction. Any other reading, the court maintained, would render the language "in connection with the purchase or sale of any security" meaningless.

The Court elaborated on its decision that the misappropriation theory did not supply the required nexus between a deceptive act and a securities transaction. The court viewed the misappropriation theory as an unacceptable effort to create a general duty to forgo transactions informed by material, nonpublic information. The Fourth Circuit also expressed concerns that adoption of the misappropriation

theory inevitably would result in a federal common law regulating fiduciary relationships.\textsuperscript{107}

In \textit{Bryan}, the Fourth Circuit collapsed the elements of a Rule 10b-5 violation into a "single indivisible requirement."\textsuperscript{108} Once it had done so, its rejection of the misappropriation theory necessarily followed.\textsuperscript{109} The act of misappropriating nonpublic information is independent of the securities transaction in which that information is used for the personal benefit of the trader.\textsuperscript{110} Thus, by reading Rule 10b-5 and section 10(b) as dictating a "single indivisible requirement" for liability, the court begged the question of the misappropriation theory's validity.\textsuperscript{111}

II. RESOLVING THE CONFLICT: \textit{UNITED STATES v. O'HAGAN}

The Fourth Circuit's decision in \textit{Bryan} ignited a controversy over the misappropriation theory in the criminal context, and a mini-explosion of scholarship on the issue ensued.\textsuperscript{112} The controversy heightened further when the Eighth Circuit followed the Fourth Circuit's lead in rejecting the misappropriation theory.\textsuperscript{113} In order to resolve the growing circuit split, the Supreme Court granted certiorari to review the Eighth Circuit's decision.\textsuperscript{114}

In 1997, in \textit{United States v. O'Hagan}, the Supreme Court endorsed the misappropriation theory in the criminal context.\textsuperscript{115} By doing so, the Court reinstated convictions of James O'Hagan, an attorney who had traded in securities with knowledge of material, nonpublic information that he had misappropriated from one of his law firm's corporate clients.\textsuperscript{116} The Court ruled that: (1) Mr. O'Hagan's breach of his fiduciary duty to his law firm and its client constituted fraud; and (2) the fraud occurred "in connection with the purchase or sale of securities."\textsuperscript{117}

Because the Eighth Circuit had not reached all the issues that Mr. O'Hagan had raised on appeal, the Supreme Court remanded the case to the Eighth Circuit for further proceedings. See id. at 678.
\item[\textsuperscript{117}] See id. at 653. Justice Ginsberg wrote the opinion for the Court.
\end{itemize}
Citing Chiarella, the Court asserted that the element of fraud in a violation of Rule 10b-5 required breach of a duty existing apart from federal securities law. In this case, Mr. O'Hagan clearly had breached fiduciary duties to both his law firm and its client. Even the dissenting Justices acknowledged that Mr. O'Hagan’s conduct constituted fraud within the meaning of Rule 10b-5.

The Court next addressed the requirement that the fraud be committed “in connection with the purchase or sale of any security.” The Court reasoned that Mr. O'Hagan’s fraud was consummated not when he obtained the confidential information, but when he used that information for personal profit in the context of a securities transaction. Acknowledging that there are other conceivable uses for non-public information of the type that Mr. O'Hagan misappropriated, the Court made the common-sense assumption that most people would find such information valuable only in the context of its use in the securities markets. The Court distinguished the facts of O'Hagan from a hypothetical situation where a person embezzled money, then used the ill-gotten funds to purchase securities. Such a scheme would not fall within Rule 10b-5’s prohibitions, the Court reasoned, because the fraud is complete when the money is obtained; the securities transaction is not an integral part of the fraud, as it is in a case involving misappropriated nonpublic information.

Having established that Rule 10b-5 encompasses the misappropriation theory, the Court justified its interpretation of the Rule in light of the policies underlying the federal securities laws. The Court asserted that informational advantages obtained scurrilously could undermine investor confidence in securities markets. Some actors might forgo securities investments altogether; others might incur ine-
sufficient costs in an effort to avoid dealing with unscrupulous investors.\textsuperscript{128} If the law is to prevent these deleterious effects, the Court reasoned, it makes no sense to distinguish between traditional insiders and misappropriators of material, nonpublic information.\textsuperscript{129} The language of Rule 10b-5 and section 10(b) is amenable to a broad interpretation, the Court reasoned, and the Court determined that policy considerations favored a broad reading in this case.\textsuperscript{130}

Despite its endorsement of the broad policy concerns underlying Rule 10b-5, the Court ultimately adopted a narrower conception of the misappropriation theory in \textit{O'Hagan} than Chief Justice Burger had advocated in his dissenting opinion in \textit{Chiarella}.\textsuperscript{131} Whereas Chief Justice Burger's theory would have required possessors of misappropriated, material, nonpublic information to disclose that information to other parties in a securities transaction, the theory adopted by the Court in \textit{O'Hagan} only requires the actor to disclose his or her intentions to the source of the information.\textsuperscript{132} The Court acknowledges that the trader's disclosure of his intentions to the source of the material, nonpublic information does little to advance the policy goals of Rule 10b-5.\textsuperscript{133} Nevertheless, the Court concluded that the language of Rule 10b-5 requires this result.\textsuperscript{134} Where the trader has made full disclosure to the source of the information, there has been no breach of the trader's duty to the source of the information, and thus there can be no liability under Rule 10b-5.\textsuperscript{135}

\textsuperscript{128} See id. at 659.
\textsuperscript{129} See id. The Court does not consider the argument that the victims of traditional insiders have a right to expect those insiders to deal fairly with them because the parties have a fiduciary relationship. As Justice Cardozo famously said, "[n]o forms of conduct permissible in a workaday world for those acting at arm's length, are forbidden to those bound by fiduciary ties." \textit{Meinhard v. Salmon}, 164 N.E. 545, 546 (N.Y. 1928). Traditionally, the law has not imposed duties of loyalty upon parties to a discrete transaction, who presumably are "acting at arm's length." See \textit{id.} Although the arguments in favor of interpreting the securities law to create such a duty are strong, it would hardly have been unprecedented or illogical for the Court to reach the contrary conclusion, particularly in light of the Court's prior, repeated insistence that Rule 10b-5 penalizes only violations of duties that exist apart from federal securities law. \textit{See}, e.g., Dirks v. SEC, 463 U.S. 646, 654 (1983).

\textsuperscript{130} See \textit{O'Hagan}, 521 U.S. at 659.
\textsuperscript{131} See id. at 655 n.6. ("The Government does not propose that we adopt a misappropriation theory of that breadth."); \textit{Chiarella v. United States}, 445 U.S. 222, 240 (Burger, C.J., dissenting).

\textsuperscript{133} See \textit{O'Hagan}, 521 U.S. at 659 n.9 ("[S]uch conduct may affect the securities markets in the same manner as the conduct reached by the misappropriation theory. [Nevertheless,] the fact that §10(b) is only a partial antidote . . . does not call into question its prohibition of conduct that fails within its textual proscription.").

\textsuperscript{134} See \textit{id}.

\textsuperscript{135} See \textit{id.}, at 656.
Justice Scalia dissented from the Court’s reinstatement of Mr. O’Hagan’s convictions under Rule 10b-5. In a brief opinion, Justice Scalia acknowledged that the majority’s interpretation of Rule 10b-5 was reasonable. He argued, however, that the majority’s expansive reading was not appropriate in a criminal case like O’Hagan. In light of the general principle that courts should construe ambiguity in criminal statutes in favor of lenity, Justice Scalia argued that the Court should have construed the language “in connection with the purchase or sale of any security” to require fraud on a party to a securities transaction.

Justice Thomas, joined by Chief Justice Rehnquist, also dissented. Justice Thomas agreed with the Court’s determination that Mr. O’Hagan’s actions constituted fraud within the meaning of Rule 10b-5. Justice Thomas disagreed, however, with the Court’s ruling that the fraud occurred “in connection with the purchase or sale” of securities. He argued that the government’s version of the misappropriation theory was unworkable, and that the Court had improperly substituted its own version of the misappropriation theory in place of the government’s proffered theory.

Justice Thomas attacked the majority’s distinction between the use of misappropriated information in a securities transaction, which is a violation of Rule 10b-5, and the use of misappropriated money in a securities transaction, which is not a violation. He rejected the majority’s assertion that the fraud in the latter case is complete when the wrongdoer obtains the money, but the fraud in the former case is consummated only when the wrongdoer uses the information in a securities transaction. He argued that information, like money, has many potential uses. Thus, Justice Thomas argued, the misappropriation...
tor of material, nonpublic information has completed a fraud when that information is obtained wrongfully.\textsuperscript{147}

The majority conceded that the government overstated its argument when it stated that the misappropriator's "only" possible use for material, nonpublic information is its use in a securities transaction.\textsuperscript{148} Justice Thomas seized on this admission by the majority.\textsuperscript{149} He accused the majority of violating a basic principle of administrative law by fashioning an alternative explanation for the SEC after rejecting the SEC's own explanation.\textsuperscript{150} He also noted that the Court's determination that misappropriated nonpublic information is "ordinarily" only valuable in the context of a securities transaction was unsupported by factual findings.\textsuperscript{151}

III. \textbf{CIVIL ACTIONS UNDER RULE 10b-5 AND THE MISAPPROPRIATION THEORY}

Section 10(b) and Rule 10b-5 are criminal enactments.\textsuperscript{152} Nevertheless, courts have long recognized a private cause of action for persons who are harmed by violations of Rule 10b-5.\textsuperscript{153} Because civil actions under Rule 10b-5 further the goals of federal securities regulation, such actions have been an important part of securities regulation for many years.\textsuperscript{154}

In 1946, in \textit{Kardon v. National Gypsum Co.}, the United States District Court for the Eastern District of Pennsylvania held that a private cause of action exists under Rule 10b-5.\textsuperscript{155} Although only a district court opinion, \textit{Kardon} today is acclaimed as a landmark case in securities law.\textsuperscript{156} The court based its holding on the policies underlying tort law and the federal securities laws.\textsuperscript{157}

\textsuperscript{147} See id. Justice Thomas does not consider that the mere possession of nonpublic information generally does not entail a breach of fiduciary duty.
\textsuperscript{148} See id. at 657.
\textsuperscript{149} See id. at 687 (Thomas, J., dissenting).
\textsuperscript{151} See O'Hagan, 521 U.S. at 688.
\textsuperscript{154} See \textit{Blue Chip Stamps} v. Manor Drug Stores, 421 U.S. 723, 730 (1975).
\textsuperscript{155} 69 F. Supp. at 514.
\textsuperscript{156} See id. \textit{Kardon} has been cited in 11 different Supreme Court opinions. See \textit{Blue Chip Stamps}, 421 U.S. at 780. It was well-settled that Rule 10b-5 created a private right of action by the time the Supreme Court addressed the issue. See id.
\textsuperscript{157} See \textit{Kardon}, 69 F. Supp. at 513, 514.
The plaintiffs in *Kardon* alleged that the defendants persuaded them to sell stock for considerably less than its true value.\(^{158}\) The plaintiffs alleged they sold the stock because of misrepresentations made by the defendants.\(^{159}\) The court accepted without discussion the assertion that the alleged conduct, if proven in a criminal case, would constitute a violation of Rule 10b-5.\(^{160}\)

Although the defendants' alleged conduct undisputedly ran afoul of Rule 10b-5, the defendants argued that the plaintiffs had no cause of action based on that provision.\(^{161}\) In support of their argument, the defendants noted that several other provisions of the Securities Exchange Act of 1934 expressly provided civil remedies for parties aggrieved by violations of those provisions.\(^{162}\) Because section 10(b) lacked such a provision, the defendants argued, the court could infer that Congress intended to deny parties like the plaintiffs a cause of action based on section 10(b).\(^{163}\)

Although the court acknowledged that the defendants' argument based on statutory construction was strong, it nonetheless rejected the argument.\(^{164}\) Instead, the court focused on the broad purpose of the Exchange Act—regulation of securities transactions of all kinds.\(^{165}\) Rule 10b-5 condemns manipulative and deceptive practices in the securities markets.\(^{166}\) The defendants' alleged conduct, if proven, clearly would fall within the realm of activities condemned by Rule 10b-5.\(^{167}\)

Applying traditional principles of tort law, the court stated that a private cause of action may be inferred from a criminal statute unless the legislature explicitly forecloses such a right.\(^{168}\) Neither the Exchange Act in general nor section 10(b) in particular, the court determined, expresses a clear congressional intent to foreclose private causes of action.\(^{169}\) The court asserted that the violation of a statute constitutes a tort, and in light of the lack of language foreclosing a

private cause of action under Rule 10b-5, the court allowed the plaintiffs' action to proceed.\(^{170}\)

The court in \textit{Kardon} relied on a wide range of policies to support its holding that a plaintiff could maintain a civil suit based on conduct violative of Rule 10b-5.\(^{171}\) First, the violation of a criminal statute generally is considered a tort.\(^{172}\) Therefore, parties who are victimized by criminal activity may maintain a suit for damages against the wrongdoer, unless such a right is explicitly denied by the legislature.\(^{173}\) Second, the purpose of Rule 10b-5 is the proscription of manipulative and deceptive practices in securities markets.\(^{174}\) By permitting private actions based on violations of Rule 10b-5, the courts assist the SEC in effectuating Congress's goals under the Exchange Act.\(^{175}\) Lastly, Congress enacted federal securities laws for the benefit of investors.\(^{176}\) Recognizing a private cause of action furthers the interests of investors by allowing investors that are harmed by violations of Rule 10b-5 to seek judicial redress of their injuries.\(^{177}\)

In 1983, in \textit{Moss v. Morgan Stanley, Inc.}, the Second Circuit held that the misappropriation theory may not serve as the basis for a lawsuit under Rule 10b-5 by a party to whom the misappropriator owes no duty apart from the securities laws.\(^{178}\) The court's analysis in \textit{Moss} focused on the lack of any specific duty owed by the defendants to the plaintiffs.\(^{179}\) The court reasoned that because no such duty existed, the plaintiffs had no cause of action against the defendants, even though the plaintiffs alleged that they were injured by the defendants' illegal activities.\(^{180}\)

\textit{Moss} was a class-action suit, brought on behalf of all shareholders who sold stock in a company just before a tender offer was made for that company's stock.\(^{181}\) The defendants in \textit{Moss} were an investment banking firm and several of its fiduciaries.\(^{182}\) Two of the individual

defendants had received criminal convictions under the misappropriation theory of Rule 10b-5 for the conduct at issue in Moss. The Second Circuit considered and rejected three possible sources from which the defendants in Moss could be said to owe a duty to the class of plaintiffs. Most significantly, the court held that the defendants' admittedly criminal conduct did not expose them to civil liability for injuries caused by their criminal acts, except to the extent that the defendants had some pre-existing duty to those parties. The court also rejected arguments that the defendants actually were insiders of the target corporation.

The existence of a private cause of action under Rule 10b-5 has been settled for many years now. Nevertheless, Moss remains the only appellate-level case involving the validity of the misappropriation theory in the civil context. The Supreme Court's opinion in O'Hagan did not address the issue.

IV. ANALYSIS: EXPANDING THE LAW TO PROMOTE JUSTICE

A. Into the Abyss: Scrutinizing the Logic of O'Hagan

In O'Hagan, the Supreme Court upheld the validity of the misappropriation theory. An abundance of case law on the misappropriation theory had developed in lower courts during the seventeen years after Chiarella, but neither the majority nor the dissenters made much use of this body of case law in their opinions in O'Hagan. Instead, the O'Hagan opinions rely primarily on novel arguments, supported by snippets of reasoning from prior Supreme Court cases that presented issues quite different from the issues in O'Hagan.

183 See Moss, 719 F.2d at 9 n.6.
184 See id. at 13-15.
185 See id. at 13.
186 See id. at 13-14. Of course, if the defendants were traditional insiders, the plaintiffs would have had a cause of action. See Kardon, 69 F. Supp. at 514.
187 See Blue Chip Stamps, 421 U.S. at 730.
188 See generally O'Hagan, 521 U.S. at 642.
189 See id. at 650.
190 The Court's only mention of these lower-court decisions comes in a footnote in the majority opinion. See id. at 650 n.3 (citing United States v. Chestman, 947 F.2d 551, 556 (2d Cir. 1991); SEC v. Cherif, 933 F.2d 403, 410 (7th Cir. 1991); SEC v. Clark, 915 F.2d 439, 453 (9th Cir. 1990)). The Court also virtually ignores Carpenter v. United States, 484 U.S. 19, 24 (1987), where the Court deadlocked on the issue of the misappropriation theory's validity.
191 See O'Hagan, 521 U.S. at 656-57 (distinguishing misappropriation of information from theft of money); id. at 679 (Scalia, J., dissenting) (arguing that principle of lenity in interpretation of criminal statutes forecloses enforcement of misappropriation theory in the criminal context); id. at 687 (Thomas, J., dissenting) (citing Motor Vehicle Mfrs, Ass'n v. State Farm Mut. Auto. Ins.
One of the most striking aspects of the majority opinion in \textit{O'Hagan} is the nonchalance with which the Court dismissed language from its opinion in \textit{Chiarella}.\textsuperscript{192} The Court correctly notes that \textit{Chiarella} expressly leaves open the question of the misappropriation theory's validity.\textsuperscript{193} When the Eighth Circuit rejected the misappropriation theory, however, that court was influenced by the Supreme Court's statement in \textit{Chiarella} that liability under Rule 10b-5 "is premised upon a duty to disclose arising from a relationship of trust and confidence between parties to a transaction."\textsuperscript{194} The Supreme Court disavowed any intention to reject this language, instead maintaining that these statements were intended merely to "[reject] the notion that section 10(b) stretches so far as to impose a general duty between all participants in market transactions to forgo actions based on material, nonpublic information."\textsuperscript{195} Although the Court ignores the issue, its decision in \textit{O'Hagan} effectively limits \textit{Chiarella} to this narrow holding.\textsuperscript{196}

Like the majority opinion, Justice Thomas's dissenting opinion attempts to break new ground.\textsuperscript{197} The government maintained at oral argument that use of misappropriated information in a securities transaction violates Rule 10b-5, whereas use of misappropriated money in a securities transaction does not violate the Rule.\textsuperscript{198} Justice Thomas argued that there is no difference, for purposes of the securities laws, between misappropriation of information and misappropriation of money for use in securities transactions.\textsuperscript{199} Justice Thomas's argument, however, is misplaced; Mr. O'Hagan probably did not commit a fraud against his law firm and its client merely by obtaining the information.\textsuperscript{200} Rather, the fraud occurred only when he used the information in the securities markets, thereby "misappropriating" it for his own use.\textsuperscript{201} However typical or atypical the facts of \textit{O'Hagan} may have been, the case was easily distinguishable from a hypothetical case involving the use of misappropriated money in a securities transaction.\textsuperscript{202}

\textsuperscript{192}See \textit{id.} at 662.
\textsuperscript{193}See \textit{id.}
\textsuperscript{195}See \textit{O'Hagan}, 521 U.S. at 662.
\textsuperscript{196}See \textit{id.}
\textsuperscript{197}See \textit{id.} at 681-85, 687 (Thomas, J., dissenting).
\textsuperscript{198}See \textit{id.} at 688-84 (citing the transcript from oral argument).
\textsuperscript{199}See \textit{id.} at 686.
\textsuperscript{201}See \textit{id.} at 656.
\textsuperscript{202}See \textit{id.} at 681-85 (Thomas, J., dissenting).
The majority's modification of the government's version of the misappropriation theory evokes the most heated criticism in Justice Thomas's dissent. He argued that the majority must accept or reject the SEC's version of the misappropriation theory in toto. The case upon which he relied—Motor Vehicle Manufacturers Association v. State Farm Mutual Automobile Insurance Co.—however, has little relevance to O'Hagan. State Farm involved a challenge to an agency's rulemaking process; in O'Hagan, no one contested the validity of Rule 10b-5. Furthermore, the Court's insistence on sound agency reasoning in State Farm was sensible, given the great deference that courts give to agency action in such circumstances. In his dissent in O'Hagan, Justice Scalia correctly criticized Justice Thomas for failing to distinguish cases where agency action receives "Chevron deference" from cases like O'Hagan, where agency reasoning has no more legal significance than any other argument made by a party during litigation.

B. Expanding the Misappropriation Theory to Promote Consistent Justice

In light of the policies favoring private actions under Rule 10b-5, the right to bring such actions should extend to investors who are victimized by persons who trade on the basis of misappropriated, material, nonpublic information. This is especially so now that O'Hagan has settled the validity of the misappropriation theory in the criminal context. Recognizing such a right of action is consistent with the principle that the violation of a statute is a tort. Courts should compel those who violate the law to compensate the victims of their unlawful activity. Such an obligation furthers the purposes of

204 See id.
205 See generally O'Hagan, 521 U.S. 642; State Farm, 463 U.S. at 39. In State Farm, the Court held that rescission of a regulation by the Department of Transportation was arbitrary and capricious, in violation of the Administrative Procedure Act. See State Farm, 463 U.S. at 39. Although conceding that a reasonable explanation for the agency's action could be formulated, the Court refused to supply a reasoned basis for the agency's decision that the agency itself had failed to supply. See State Farm, 463 U.S. at 43.
206 See State Farm, 463 U.S. at 39.
207 See id. at 43.

212 See id.
the securities laws which, post-*O'Hagan*, clearly proscribe the misappropriation of material, nonpublic information for use in securities transactions.\(^{213}\) Furthermore, imposing such a duty would protect the investing public, which is ultimately the intended beneficiary of the securities laws.\(^{214}\)

The policy considerations cited in *Kardon* favor the allowance of civil actions based on the misappropriation theory of Rule 10b-5 liability.\(^{215}\) First, because the violation of a criminal statute is a tort, parties who are victimized by such a violation should be allowed to maintain a suit for damages against the wrongdoer, unless the legislature specifically forecloses such a right.\(^{216}\) Second, the purpose of Rule 10b-5 is the proscription of manipulative and deceptive practices in securities markets.\(^{217}\) By permitting private actions based on both the traditional and misappropriation theories of Rule 10b-5, the courts would assist the SEC to the greatest extent possible in effectuating Congress's intentions.\(^{218}\) Lastly, Congress enacted federal securities laws for the benefit of investors.\(^{219}\) Allowing a private right of action for damages caused by Rule 10b-5 "misappropriation" would further the interests of investors by allowing them to seek judicial redress for injuries caused by criminal conduct.\(^{220}\)

Failure to extend the misappropriation theory to the civil context would frustrate the policy objectives favoring civil actions under Rule 10b-5.\(^{221}\) The general policy of tort law favoring private rights of action for statutory violations would be compromised needlessly.\(^{222}\) Failure to extend the misappropriation theory to the civil context also would compromise the central purpose of Rule 10b-5—the prevention of manipulative and deceptive practices in the securities markets.\(^{223}\) Civil actions complement enforcement actions by the SEC and the Justice Department, thereby expanding the reach and enhancing the effectiveness of Rule 10b-5.\(^{224}\)

Few lawsuits have been brought to date under the misappropriation theory of Rule 10b-5, perhaps due to the courts' unwillingness in recent years to entertain novel private causes of action under Rule 10b-5. Nevertheless, there is no principled distinction between traditional insiders and misappropriators of nonpublic information. Courts that focus on the absence of duty owed by a misappropriator to actors in the securities markets essentially require the plaintiff to prove the common law elements of fraud. By doing so, these courts effectively nullify the benefits of allowing private causes of action under Rule 10b-5, because aggrieved persons are not afforded any rights under the Rule that were not previously afforded to them under state law.

The arguments against the misappropriation theory in the criminal context are not without merit. Nevertheless, O'Hagan has resolved this controversy in favor of the misappropriation theory's validity. In light of this reality, there is no good reason to distinguish between misappropriators and traditional insiders, thereby denying the victims of the former the right to seek restitution under Rule 10b-5.
